Learning Journey

Launch Week!

This week we have reaffirmed our school's approach to teaching and learning through our Learning Journey Launch Week. Throughout the week we have been explicitly talking to children about how it feels when our learning is tricky – when we are in the pit - and how we can overcome this to be successful during our learning moments. We have had a special assembly with Ms. Upton and we have been looking at this throughout our learning across the curriculum this week. Year 1 used these skills when they were focusing on zipping up their own coats!

Our Learning Journey

Children's University!

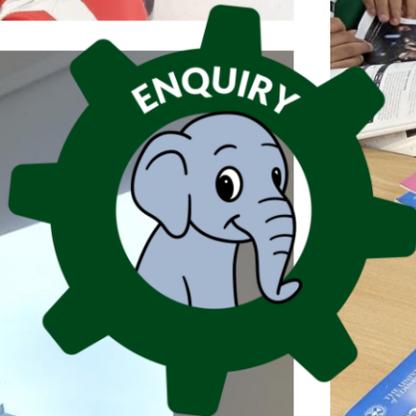

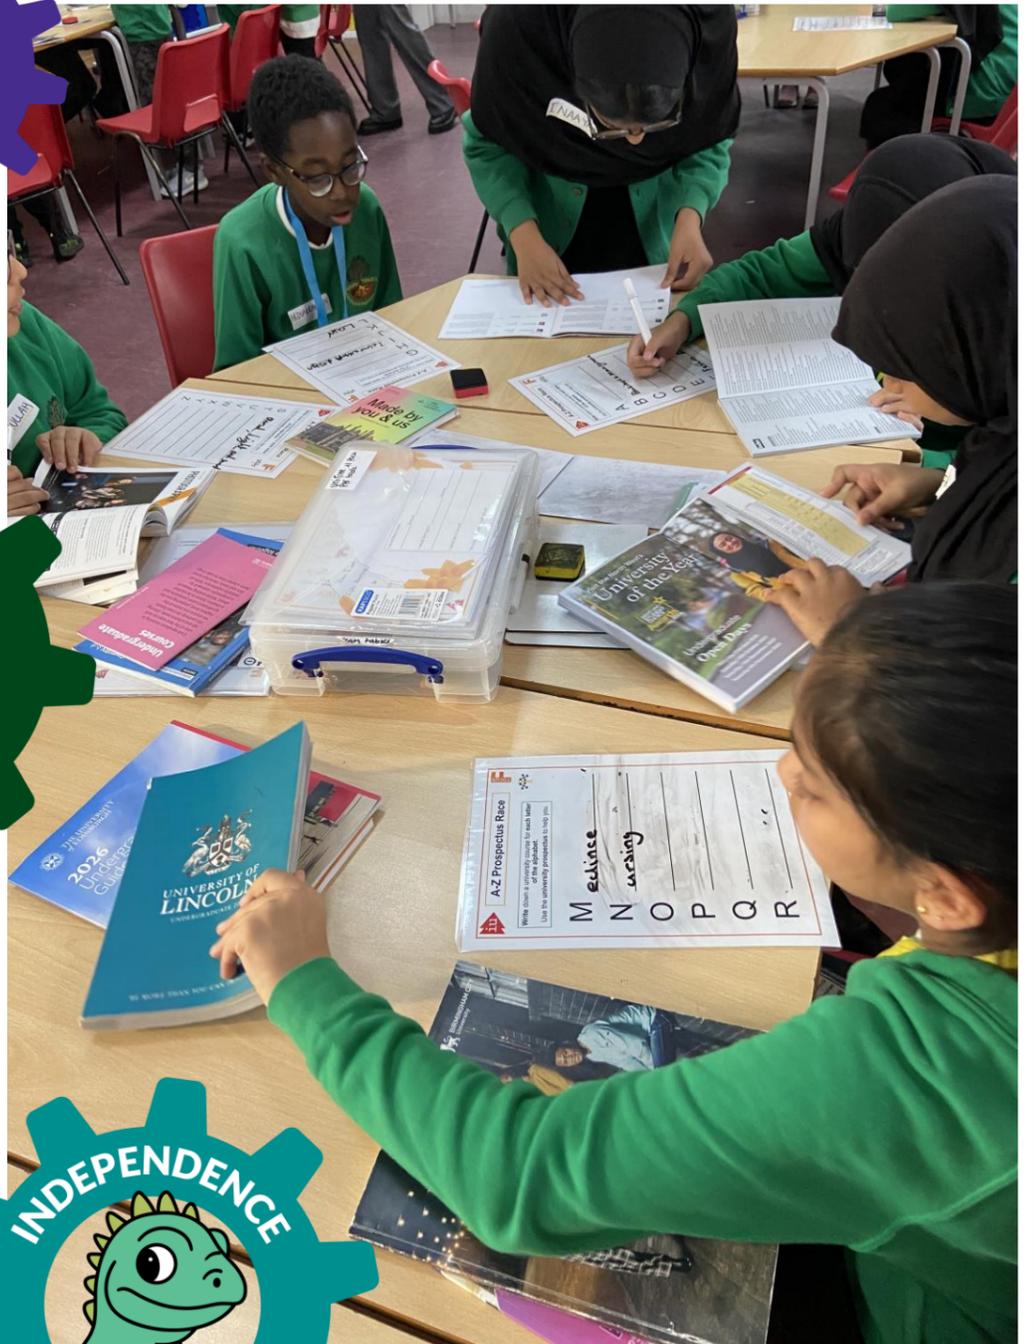

We took a small group of Year 5 children to Leeds Trinity University in the city centre. They were all impeccably behaved and fully enjoyed the activities they participated in. The day began with a lively drama session where the children were asked to explore choices with money. Using the scenario of being given £5, they needed to work together to decide whether to buy sweets, slime, socks, save the money or use it to do something helpful. This activity allowed them to learn about spending, giving and saving in a fun and exciting way.

As part of the visit, we were given a tour of the law and policing department which included seeing the process of booking into a police station, CCTV, a holding cell and a mock courtroom. This was a fantastic opportunity for the children which they thoroughly enjoyed.

Year 6 Into University!

This week at school we have been enjoying seeing our classmates and teachers after the half-term break! Year 6 have been taking part in an immersive learning experience at Into University. They have been exploring the creative arts and even visited Leeds City Art Gallery.
